Basecoats Overview

DuPont™ ChromaBase™ Basecoat

ChromaBase™ is an easy-to-use, fast drying basecoat with good fill. Select from a wide choice of solid, metallic, and pearl colors, and a multitude of special-effect colors. It is available in both mix and factory-package for spot, panel and overall repairs.

DuPont™ ChromaPremier® Basecoat

A high-performance, fast-drying, isocyanate-activated basecoat that makes premium spot, panel and overall repairs more productive. This high-hiding basecoat is easy to apply, lays down smoothly, and has excellent mottle control. It delivers superior appearance in solid, metallic, pearlescent and special-effect ChromaLusion® Colors.

DuPont™ ChromaPremier® ChromaLusion® Colors

DuPont™ ChromaPremier® ChromaLusion® Colors is a revolutionary special-effect basecoat with high performance and ease of use. These factory-packaged basecoats are based on unique Mirrometric™ pigment technology. The color appearance will change dramatically based on the viewing angle.

DuPont™ G9900S™ Super Jet Black Basecoat

A high-performance, high-productivity, factory packaged basecoat with outstanding jetness. G9900S™ combines user friendliness and ease of application with excellent coverage, along with smooth texture and flow out. G9900S™ is extremely jet black, with a blue-black side tone, and delivers superior appearance and performance to match high-end OEM blacks.

DuPont™ ChromaSystem™ 69301S™ Basecoat Blenders

See Specialty Procedures section for Basecoat Blending Procedures.
