Color Reference Book

Spies Hecker's Color Reference Book is a collection of several of the most commonly requested tools. Included in this collection are toner characteristics and additional tools for color identification.

Color Year Books

Spies Hecker's annual color year books feature chips for car colors, including exterior, interior, underhood, bumper, and cladding colors, as supplied by each manufacturer. It also includes wheel and stripe color information and two-tone color crossover code charts.

The year books are three-hole punched and tabbed by year and manufacturer for easy storage in the Color Index Binder and future reference.

Spies Hecker publishes domestic year books in the fall and import year books in the winter.

Color Formula Retrieval System

Spies Hecker offers color formulas in many ways to accommodate the individual needs of the painter – allowing them to go from the car directly to the formula without a separate formula number. A painter only needs the manufacturer's code of a color to lead them directly to a formula, with no steps in between. Colors are listed by maker and by OEM code on the Wizard® System, and even on the Spies Hecker web site at www.spiesheckerusa.com.

The Wizard System is updated monthly and the web site is centrally updated constantly.

Model Modelo Modelo	Application Type Tipo de Aplicación Tipo del uso	Color Code(s) de Color Codificación Colores	Color Name Nom de Couleur del Color Nombre
300	EXTERIOR	P88	MIDNIGHT BLUE EFFECT

		PSB	BRIGHT SILVER EFFECT
		PM42	DEEP LAVA RED EFFECT
		PH4	BATH JACZ GREEN EFFECT
300M	EXTERIOR	PPK	MAGNESIUM EFFECT
		PS2	BRIGHT SILVER EFFECT
		PW0	COOL VANILLA
		PSR	BRIGHT SILVER EFFECT
		PSB	BRIGHT SILVER EFFECT

Domestic Compatibility Charts

Spies Hecker's compatibility chart is designed to help painters identify miscellaneous colors on vehicles that are often not labeled. These colors include stripes, bumpers and roofs. The compatibility chart is available yearly for DaimlerChrysler, Ford and General Motors, starting in 2002.

Spies Hecker Web Site

www.spiesheckerusa.com provides instant access to a wealth of resources to registered users. The site is updated constantly and offers online formula retrieval. Access to the web site gives painters an additional resource available 24 hours a day.

first time, everytime.

you achieve the perfect color, conveniently and reliably. eliminating re-repairs, shop time lost, and the waste of materials. So, you spend less time experimenting and more time painting.

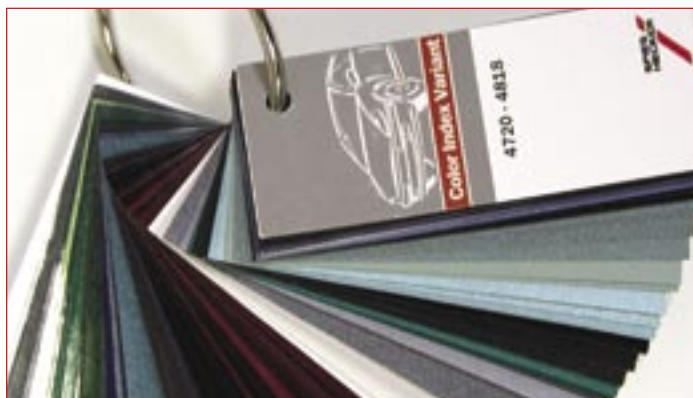

Color Mix Master

The spiral-bound Color Mix Master includes all Spies Hecker mixing color series'. Each mixing color is reproduced accurately, both as a pure color and mixed with a white or silver mixing color. Pearl colors appear on black and white backgrounds so that the effect is more easily visible. In addition, each mixing color is positioned accurately on an Oswald color circle for an easy tinting reference.

Color Variant Index

Spies Hecker's handy color variant chips are the ideal tool to have when choosing which production shade to use for a particular color. The larger chips on each page help to determine the right color formula, quickly and accurately. The chips are produced with Spies Hecker Basecoat in a sprayed application, which reduces the color variance between the variant chip and the color formula. The chips are housed in a metal storage cabinet with doors to help keep the chips clean. Updating is as simple as adding new rings to the metal cabinet. All variant chips are referenced by page number in the Wizard system.

Spies Hecker introduces color variant swatches twice per year.

Color Index Binder

The perfect accessory for storing the majority of Spies Hecker color documentation tools. Keep your color documentation tools neat, organized, and easy to find in our recognizable 4" binder. The binder can hold approximately eight years of color year books and information.

Color Service Department

Our Color Service Department is filled with color experts offering helpful and competent advice. For assistance with a color inquiry, contact Spies Hecker's Color Service Department at 800-44-SPIES. The department is staffed from 8:00 - 6:00 EST.
