

MANAGEMENT BULLETIN

September 2006

Chemical Inventory List and Material Safety Data Sheets

You are required to have a list of chemicals in your shop (Chemical Inventory List) and a complete set of Material Safety Data Sheets (MSDS') readily available for your employees during all working hours. Employees are required to know where MSDS' are located. **We suggest posting the MSDS poster found in your User's Guide to make sure they know where your MSDS' are located.**

Much of the sheet metal you purchase is coated with a variety of hazardous materials. This means you need MSDS' for the sheet metal you purchase.

If you need any MSDS', particularly from your parts vendors, just send us their names and addresses. As part of your Compliance Department subscription, we'll send them letters requesting the same, at no cost to you

Federal regulations do not require a hard copy of MSDS' on site if they are readily available to employees electronically. However, local agencies / fire departments may require the hard copy at your facility.

If you have any questions or concerns, please call us at (800) 619-9733.

The information in this Compliance Alert is for directional purposes only and should not be used to determine regulatory compliance.
